RE: Price update

To Whom It May Concern:

Effective March 1 2009, MFP will enact an eight percent price increase on our MFP 2007 Sealing Device Catalog for the following sealing devices:

Inch Seals

Miscellaneous products

MPSU metric U-cups

We will continue to maintain our current price levels on our MSC Seal Kit Catalog and all remaining Metric parts with the exception of the MPSU range.

We have made every attempt to avoid the increase, but we refuse to compromise on quality. This is our only recourse. We think you will agree that the quality of MFPs products should not be sacrificed. We will not be printing a new seal catalog at this time, in an attempt to keep our operating costs as low as possible. If you require either our MFP 2007 Sealing Device or MSC 2008 Seal Kit catalog please contact customer service at any MFP branch office.

Regards,

Ryan King
