

Introducing Our Latest Addition. The Haas Turning Center.

Continuing our commitment to offer our customers a quick turn around with the highest of quality, MSC Machined Seals recently expanded its line of CNC lathes. Our newest Haas will help lower lead times by increasing our daily production volumes, especially on smaller diameter higher volume products.

As always we will continue to offer our full service seal making capabilities. Standard seal profiles, custom shapes, prototype or production, MSC Manufacturing can handle your needs.

If volume exceeds the cost effectiveness of CNC machining we also have molding capabilities in house.

We're buying American made equipment
to machine American made seals.
Help us support - Made In USA.
