

Metallic Rod Scraper - SC

A product of MFP Seals.

Light Duty

SC

METALLIC ROD SCRAPER - SC

Metallic Rod Scrapers effectively remove contaminants from the rod surface, helping to prevent the intrusion of foreign materials, allowing packings to last longer and maintain a better seal. They are self-adjusting, low-friction, long-lasting and are simple to install.

Our SC scraper is comprised of two flexible brass or bronze rings encased in a synthetic rubber cushion. The cushion ring helps absorb side loads while exerting an inward force to keep the metal scraping rings in contact with the rod surface. A bronze case is added for increased durability where a press-in scraper is required.
