Subject: MFP operating as Essential Supplier COVID-19

To our Customers,

With rapidly growing concerns over COVID-19 and many states now issuing orders to shelter in place we are aggressively trying to do our part. Keeping our employees safe along with helping you, our customer, with critically necessary supply, are the top priorities. Under the provision "Essential Business" MFP Seals is considered an essential supplier to many industries. Under the Michigan Order No. 2020-21 section 8 & 9 for critical infrastructure workers we service medical, food and agriculture, energy, water & wastewater, transportation, public works, critical manufacturing, chemical supply chains & safety as well as defense Industrial base. With many customers having already reached out and looking for support to keep these critical operations running, we want to assure you we are remaining open and will help in any way we can.

As a manufacturer headquartered in Michigan and distribution centers in Michigan, Florida, Louisiana, Texas, Arizona, United Kingdom & Taiwan, we will continue to support you. MFP is fully operational now and is also willing to adapt our unique manufacturing capabilities to assist as needed. We have injection molding and CNC machining equipment ready to make thermoplastic, elastomeric, and composite components that would be required in critical lifesaving equipment. Our tooling department is also on standby, ready to make any necessary tooling required.

Regards,

Ryan King
President
Martin Fluid Power / (DBA MFP Seals)
