

METALLIC ROD WIPERS

MFP SEALS' METALLIC ROD WIPERS ARE DESIGNED TO KEEP THINGS CLEAN, INSIDE AND OUT!

ON THE INSIDE

Metallic Rod Wipers help prevent the intrusion of foreign materials, from dirt to rust, machining swarf, sand, slag, paint chips and more.

ON THE OUTSIDE

Metallic Rod Wipers scrape contaminants from the rod allowing packings to last longer and maintain a better seal.

MFP Seals' Metallic Rod Wipers are the first line of defense to protect your cylinders' rod seals, packings, bearings, rods, machine spindles, guide pins and other rod surfaces.

All of these Metallic Rod Wipers effectively remove contaminants from the rod surface, are self-adjusting, low-friction, long-lasting and are easy to install.

S

SW

SC

SWC

Two flexible brass or bronze wipers (scrapers) encased in a Nitrile, FKM, or PTFE cushion. The cushion ring helps absorb side loads while exerting an inward force to keep the metal wipers in contact with the rod surface. Other Materials are available.

SWCP

HWCP

The SW has an additional rubber cushion under the scraper rings for improved stability and added sealing against the elements.

The SC adds a bronze case to the S design, for increased durability, when a press-in wiper is required.

The SWC adds a rubber cushion under the scraper rings that improves stability and sealing against the elements.

If your application demands even more from your rod wipers, be sure to ask about our SWCP and HWCP, HEAVY-DUTY, Premium Metallic Rod Wipers.

Give us a call today! We can help you select the best Metallic Rod Wiper for your application.

The SWC adds a bronze case to the SW design, for increased durability, when a press-in wiper is required.

METALLIC ROD WIPER CUSHION MATERIAL DATA

NITRILE

Operating Temperature Range
-40°F to +250°F (-40°C to +121°C)

FKM

Operating Temperature Range
-5°F to +400°F (-21°C to +204°C)

PTFE

Operating Temperature Range
-375°F to +400°F (Cryogenic to +204°C)
